

Product 655523

655523 ProClip ONLY for automatic gear shift.

Center mount

Keep your device within easy sight and reach in your car! The ProClip makes it easier and safer to use handheld devices in vehicles. The ProClip is a mounting bracket that you attach to the dashboard of your car. Onto the ProClip, you can install any accessory, e.g. a holder for mobile phone or other communication device.

The ProClip is car specific, it is customized for each car model and has a perfect fit. The ProClip offers a firm mounting platform and is available in multiple positions for most vehicles. Discreet design that blends in well with the interior. Safe, neat and convenient!

The ProClip is easy to install, you can do it in a minute! You simply snap the ProClip into place in gaps in the interior, you do not need to drill holes or use special tools or dismantle the dashboard. Detailed mounting instructions included. The ProClip has AMPS holes for easy installation of a holder. Made of high grade ABS/Acetal plastic. Color: Black. Developed and produced in Sweden.

- Do you want to be able to switch between several holders on the same ProClip? Please see Brodit's MultiMoveClip.
- Are you installing larger devices or heavier equipment? Please see Brodit's Extra Strength Mounting Platforms and Pedestal Mounts

EAN: 7320286555234

Item no 655523 fits:

Mitsubishi L200 20-22 (England)
Mitsubishi Triton 19-22 (Australia)

INSTALLATION INSTRUCTIONS

1.

2.

3.

4.

Please read all of the instructions and look at the pictures before attaching the ProClip.

1. Use the enclosed alcohol pad to clean the area where the ProClip is to be installed. Peel off the cover of adhesive tape on the ProClip. Press the angled edge of the upper part of the ProClip into the gap between the control panel and the surrounding frame.
 2. Press the lower part of the ProClip downward/forward and hook the angled lower edge into the gap in the control panel, so the angled upper edge hooks behind the frame surrounding the control panel. Press upward on the lower part of the ProClip so the angled edge goes all the way into the gap.
 3. This ProClip can also be placed on the left air vent.
 4. The ProClip is in place.
